

XD-1500 Precision repair welding machine

Product advantages

- ✓ A multi-purpose machine, specially used for workpiece mold repair, 0.2-3.0mm plate welding, after welding the workpiece is almost no deformation.
- ✓ Low calorific value, almost no deformation/discoloration/edge biting; Suitable for all kinds of material plate welding and mold repair
- ✓ Reaching the welding repair precision of laser welding machine, welding repair speed is faster, but the price has more advantages, cost-effective;
- ✓ Can solve a variety of problems, Small parts can also be easily welding repair, suitable for a variety of parts of the problem, such as wear, depression, collapse Angle, pull marks, blister stainless steel welding, etc.
- ✓ No fixture and worktable restrictions, easy to use and flexible, can be directly operated on site

Power supply	220V±20% -50HZ
Power Consumption	10-1500w
Arc welding output	1-4 types
Resistance welding output	Spot & continuous
Machine size	460*250*320mm
Gross Weight	18kg
Argon delay time	0.9s
Welding wire size range	0.2-2.0mm
Maximum instantaneous power output	>45kw
